SUMMARY

Human-Computer Interaction student with hands-on experience in UX/UI design, user research, and usability testing. Creates wireframes, prototypes, and high-fidelity screens in Figma, turning user feedback into interface improvements that support easier navigation and better usability. Collaborates with stakeholders and team members to refine design deliverables and case studies.

WORK EXPERIENCE

Chicago, IL | Jun 2026 - Sep 2026

AI Graphic Design Intern

- Contributed to UI/UX design proposals and interface improvement concepts for internal projects.
- Created digital design assets, including LinkedIn graphics and YouTube outro animations.
- Developed a case study documenting design decisions, user needs, and potential improvements.
- Collaborated with team members and incorporated feedback to refine design deliverables.

Chennai, India | Oct 2023 - Feb 2024

UI/UX Design Intern

- Designed internal digital products using Figma, creating wireframes, user flows, and high-fidelity UI screens.
- Conducted user research and usability testing to identify user pain points and gather feedback.
- Translated research insights into design improvements to enhance usability and user experience.
- Collaborated with stakeholders and senior team members to iterate on design solutions.
